Contents of Volume 27, 1988

Number One

SNA network management directions 3
D. B. Rose and J. E. Munn

Utilizing the SNA Alert in the management of multivendor networks 15
R. E. Moore

NetView/PC 32
M. Ahmadi, J. H. Chou, and G. Gafka

An integrated network management product 45
D. Kanyuh

An architecture for a business and information system 60
B. A. Devlin and P. T. Murphy

Number Two

The design of Operating System/2 90
M. S. Kogan and F. L. Rawson III

OS/2 EE Database Manager overview and technical highlights 105
P. Y. Chang and W. W. Myre

OS/2 Query Manager overview and prompted interface 119
S. L. Watson

Writing an Operating System/2 application 134
R. L. Cook, F. L. Rawson III, J. A. Tunkel, and R. L. Williams

COBOL/2: The next generation in applications programming 158
R. Sales

Understanding device drivers in Operating System/2 170
A. M. Mizell

VGA—Design choices for a new video subsystem 185
S. Thompson

The Realtime Interface Co-Processor Multiport/2 adapter 198
S. C. G. Sykes

An introduction to typographic fonts and digital font resources 206
A. W. Griffee and C. A. Casey

Advanced Function Printing: A tutorial 219
R. K. deBry and B. G. Platte

Architectures of Advanced Function Printing 234
R. K. deBry, B. G. Platte, C. L. Berinato, and J. W. Marlin

Number Three

Introduction to Systems Application Architecture 250
E. F. Wheeler and A. G. Ganek

Common Communications Support in Systems Application Architecture 264
V. Ahuja

Common User Access—A consistent and usable human–computer interface for the SAA environments 281
R. E. Berry

Application enabling in SAA 301
D. E. Wolford

Enabling the user interface 306
S. Uhlir

Integrating applications with SAA 315
L. A. Buchwald, R. W. Davison, and W. P. Stevens

Designing SAA applications and user interfaces 325
W. P. Dunfee, J. D. McGehe, R. C. Rauf, and K. O. Shipp

Distributed files for SAA 348
R. A. Demers

Distributed database for SAA 362
R. Reinsch

SAA distributed processing 370
A. L. Scherr

The Cross System Product application generator: An evolution 384
W. K. Haynes, M. E. Dewell, and P. J. Herman

Number Four

IBM's directions in technical computing 393
P. L. Prairie and A. H. Weis

Engineering and Scientific Subroutine Library for the IBM 3090 Vector Facility 404
J. McComb and S. Schmidt

IBM Parallel FORTRAN 416
L. J. Toomey, E. C. Plachy, R. G. Scarborough, R. J. Sahulka, J. F. Shaw, and A. W. Shannon

Program locality of vectorized applications running on the IBM 3090 with Vector Facility 436
K. So and V. Zecca

Programming style on the IBM 3090 Vector Facility considering both performance and flexibility 453
H. Samukawa

ICAP/3090: Parallel processing for large-scale scientific and engineering problems 475
E. Clementi, D. Logan, and J. Saarinen

Seismic computations on the IBM 3090 Vector Multiprocessor 510
A. Kamel, M. Kindelan, and P. Sguazzero

Effective utilization of IBM 3090 large virtual storage in the numerically intensive computations of *ab initio* molecular orbitals 528
M. Sakaki, H. Samukawa, and N. Honjou

PAM-CRASH on the IBM 3090/VF: An integrated environment for crash analysis 541
P. Angeleri, D. F. Lozupone, F. Piccolo, and J. Clinckemaillie

Interactive computations and display of characteristics of the radiation scattered by a sphere: A demonstration for PS/2 Model 80 561
P. Halpern and J. V. Dave
